

January 2026

High-speed rotation atomization has never been easier

Dear ladies and gentlemen,

the supreme discipline in liquid coating does not have to be complicated: The powerful package consisting of the **TF Bell 2 atomizer** and the modular **WACON Spray control system** delivers perfect results: Finest atomization and a level of efficiency that was often impossible in the past. Precision meets performance, both in series production and in settings with frequently changing requirements.

POWDER COATING

When four booths become one

VBG Truck Equipment, a Swedish manufacturer of trailer couplings, previously had four powder coating booths in operation. However, the system no longer met modern requirements. The process has now been converted to a single booth. The result: **Easier color changes, higher coating quality, and lower powder consumption.**

[Learn more about the coating system](#)

POWDER COATING

High-performance coating of industrial vacuums

The Italian company **Delfin Industrial Vacuums** chose to internalize the powder coating of their vacuum systems - including the **SuperCenter EVO** for fast and contamination-free color change. The new powder system increased production efficiency by 20%.
