

March 2026

See you at PaintExpo!

Dear ladies and gentlemen,

PaintExpo is just around the corner. Will you be there, too? Under the theme "**Better for you**", we'll showcase technologies for liquid and powder coating that simplify operation, optimize processes, and boost your productivity. Experience our new products, digital services, live demonstrations - and a **very special highlight that's sure to captivate you!**

You'll find us in **hall 3, booth 3330**. We look forward to seeing you!

PAINTEXPO 2026

Don't miss out on these highlights

In liquid coating, we'll be showcasing the **TF Bell 2 system** - the new generation of high-speed rotation atomizers - and the innovative flushing process **Activeflush**, among other highlights. In the powder coating sector, the focus is on automation and digital features, including exciting new developments for the **Sprint 2 manual system** and our **robotic solutions**.

You bring it, we coat it: Bring a "problem" workpiece of your choice and put our Sprint 2 Expert to the test - live and hands-on!

POWDER COATING

Space-saving elevators - and a coating line that saves resources

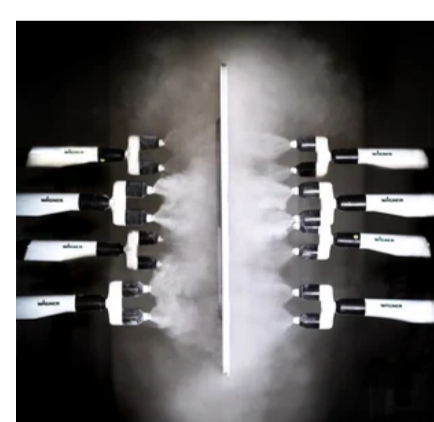

Motala Hissar is a **leading Swedish manufacturer of indoor elevators and platform lifts**. Previously, the company had been using an outdated powder system that generated a lot of waste and offered only limited automation. Time for a change: The **PXS powder center, combined with the Flowsense technology**, proved to be the most advanced solution - and now leads to significant powder savings.

ENAMEL COATING

When surfaces need to be extra tough

More than 200 automatic enamel systems from WAGNER are in use worldwide. With decades of expertise and a broad portfolio, we can help you find the right application solution - whether you're using **liquid or powder enamel**. With our specialized technology center, you can run practical coating trials to test our solutions with real-life parameters.
