Company Profile

WAGNER – Innovative coating technologies for surfaces

FOR CONSUMERS

FOR CONTRACTORS

FOR INDUSTRY

WAGNER is a market-leading manufacturer of high-tech systems and components for the application of paints and powders and various liquid media to surfaces. The WAGNER portfolio also includes the processing of liquid performance materials such as adhesives and sealants. WAGNER surface technologies are used by consumers, the professional trade and industry alike – from small, handy paint sprayers and professional equipment up to complex industrial coating systems.

For more than 75 years WAGNER has built a reputation for user-friendly, reliable and economical products and solutions with a high standard of quality and cutting-edge technology and is therefore one of the world´s recognized suppliers in the surface finishing market. Behind the innovative products, the resource-saving technologies and a personal, fast service worldwide there are 19 operative WAGNER Group companies under the umbrella of Wagner International AG with approximately 1,800 employees and around 400 international commercial agencies. The owners of WAGNER Group are the Josef Wagner Foundations, which exclusively pursue non-profitable and charitable aims.

WAGNER Product Portfolio

Since the first airless electrical paint-spraying gun “Whisker” from 1953, WAGNER has developed many innovative products for paint and lacquer coating based on airless piston and diaphragm pump technologies as well as HVLP technology. This means that DIY enthusiasts and craftsmen are sure to find the tool

that is best suited to their own field of activity in the extensive product portfolio offered by the **Decorative Finishing** division. For all those who want to design their own homes there are WAGNER quality products available for all aspects of painting, for example paint sprayers, internally-fed paint rollers with integrated paint tank, steam wallpaper strippers, heat guns and helpful accessories. The Levaro Powerbrush 18V cordless deck cleaner expands the DIY range since 2024.

WAGNER offers professional craftsmen solutions for the efficient and high-quality application of various materials. The extensive product portfolio under the WAGNER and Titan brands ranges from airless equipment for indoor and outdoor paint application to low-pressure systems for lacquer and varnish application, as well as highly viscous and filled material application, such as plasters, heavy putties and adhesives. The product range also includes devices for applying protective coatings for corrosion and building protection, floor marking for interior and exterior areas, and solutions for injection technology.

WAGNER’s devices and systems are trusted not only by DIY enthusiasts and professional contractors, but also by a wide range of industrial enterprises across various sectors. Many everyday products are industrially coated using WAGNER equipment, including construction machines, cranes, mobile phones, notebooks, refrigerators, kitchen units and the majority of light-alloy wheels in automotive original equipment worldwide. The **Industrial Solutions** division, under the brands WAGNER, WALTHER PILOT, and C.A. Technologies offers a comprehensive portfolio covering the full spectrum of industrial coating technologies. This includes solutions for the application of wet and powder coatings as well as other liquid media. The product range covers the full process chain – from material feeding and mixing to motion and control technology, including materials logistics, and extends to the application of various materials on surfaces. The product portfolio is complemented by booth and recovery technology for powder coating, as well as marking technology.

WAGNER operates eight technology centers around the world dedicated to identifying the optimal system solution for customers, as well as supporting training and research. Pioneering developments such as Flowsense for powder delivery using injector technology, the IPS coating center or the web-based COATIFY information and management platform are examples of highly efficient automation solutions in the industrial division.

In the craft sector, WAGNER's innovative strength is equally evident, for example, in the new connective airless spray devices, which are connected to the useful SprayManager app. Another notable advancement is the incorporation of Bosch's widely adopted rechargeable battery system into new cordless tools for professionals and DIY users alike. These cordless variants expand the Decorative Finishing product portfolio and make it even easier for users to achieve high-quality results quickly and effortlessly with WAGNER´s paint spray systems in.
