

### How a family business became successful in powder coating

Dear ladies and gentlemen,

getting into automated powder coating is a big step, especially for small and medium-sized companies that previously had little experience with coating. This was also the case at the German company **Schürer GmbH Metallwarenfabrik**, which initially did little coating itself and only manually.

When this was no longer economically viable, company owner Thomas Schürer invested in the compact **E-Line powder coating system** - an ideal entry-level system for automatic coating. In a current report by the German-speaking trade magazine **BESSER LACKIEREN**, you can find out which effect the system has on productivity and quality at Schürer.

#### POWDER COATING

### How you can save powder, energy & costs

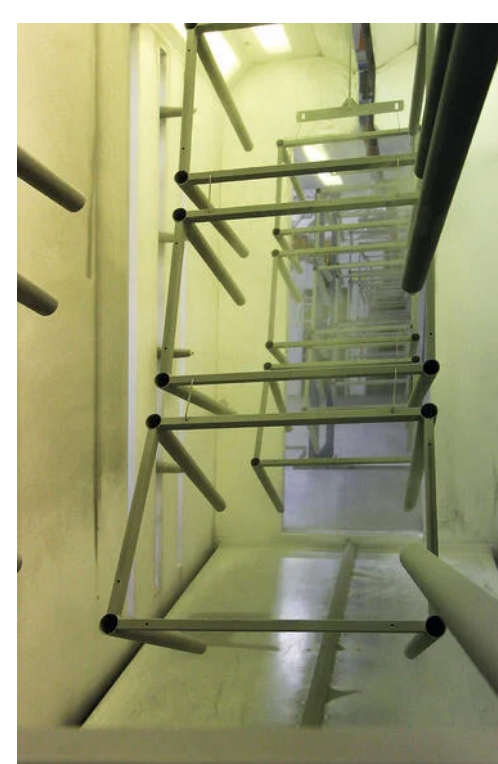

With the proven **Energy Efficiency Package (short: EEP)**, your WAGNER powder system consumes up to 40% less energy than comparable models. Thanks to the bionic elbow pipings and cyclone inset, the recovery rate is improved and the pressure loss is minimized.

#### POWDER COATING

### From office furniture to school desk components

ETRA, a manufacturer of metal furniture, benefits significantly from the **SuperCenter EVO powder center**, installed by the WAGNER subsidiary in Valmadrera, Italy (Wagner S.p.A.: [Visit on LinkedIn](#)): It has sped up color change times, thus increasing production, dramatically reducing powder disposal, and improving application quality.

#### ADHESIVE APPLICATION

### Twice as strong

The **PILOT 2K BONDING of WALTHER Spritz- und Lackiersysteme GmbH** (member of the WAGNER Group) is a manual gun for 2-component dispersion adhesives, which are processed in an external mixing process. It is used wherever highest demands on application and effectiveness must be met. The new version has been supplemented with a round/broad jet regulation as well as material quantity regulation for the B component. The material consumption is reduced and an exact mixing ratio is achieved.

#### EVENTS

### PaintExpo 2022

**World's Leading Trade Fair for Industrial Coating Technology**

26 - 29 April 2022  
Exhibition Centre Karlsruhe, Germany

In cooperation with: **JOT**

AN EXHIBIT BY **WAGNER**

At this year's PaintExpo, we will present our highlights in liquid and powder coating as well as digital coating solutions. Visit us at our **booth in hall 3!**
