

### How a manufacturer of glass bottles significantly simplified its coating process

Dear ladies and gentlemen,

coating plays a decisive role in the production of **high-quality glass bottles** with individual designs. The manufacturer Wiegand-Glas attaches particular importance to a sustainable production process and had been using an electrostatic liquid coating system for this purpose for several years.

However, the previous process was very complex, which was due to the processing of conductive water-based paint in combination with electrostatics. Wiegand-Glas wanted to make the **entire process much simpler**. In our **current practical report**, you can learn how this challenge was successfully mastered with a solution from WAGNER:

#### TECHNOLOGY CENTER

### Virtual application trials: Be there live, even from a distance

You can't come to us in Markdorf for your application trial? No problem - you can also be there virtually. By using the latest technology in Mixed Reality - the **Microsoft HoloLens** - we can transmit the test series live to you. You will see all processes directly from the eyes of our application specialist. This allows us to support you quickly and easily - we have both hands free for you and you save yourself the journey.

If you are interested, please do not hesitate to contact us. We look forward to your virtual visit!

#### BESSER LACKIEREN EXPO LIVE 2021

### How you can optimize your unit costs in the coating process

On April 29, WAGNER Industrial Solutions was represented at the **BESSER LACKIEREN EXPO live** with an online presentation. Thomas Scheible, Vice President Sales for Germany & Benelux, showed how you can optimize the unit costs in your coating process with our technology, training and service package.
