

### Perfect overview of the coating process

Dear ladies and gentlemen,

"For us, COATIFY came at just the right time. With the continuous provision of important production data on various end devices, we have the possibility to carry out an extremely reliable production monitoring. This improves process reliability and increases productivity," says Dako Lisichkov, Managing Director at Fox Laser, a leading contract manufacturer in the metalworking industry.

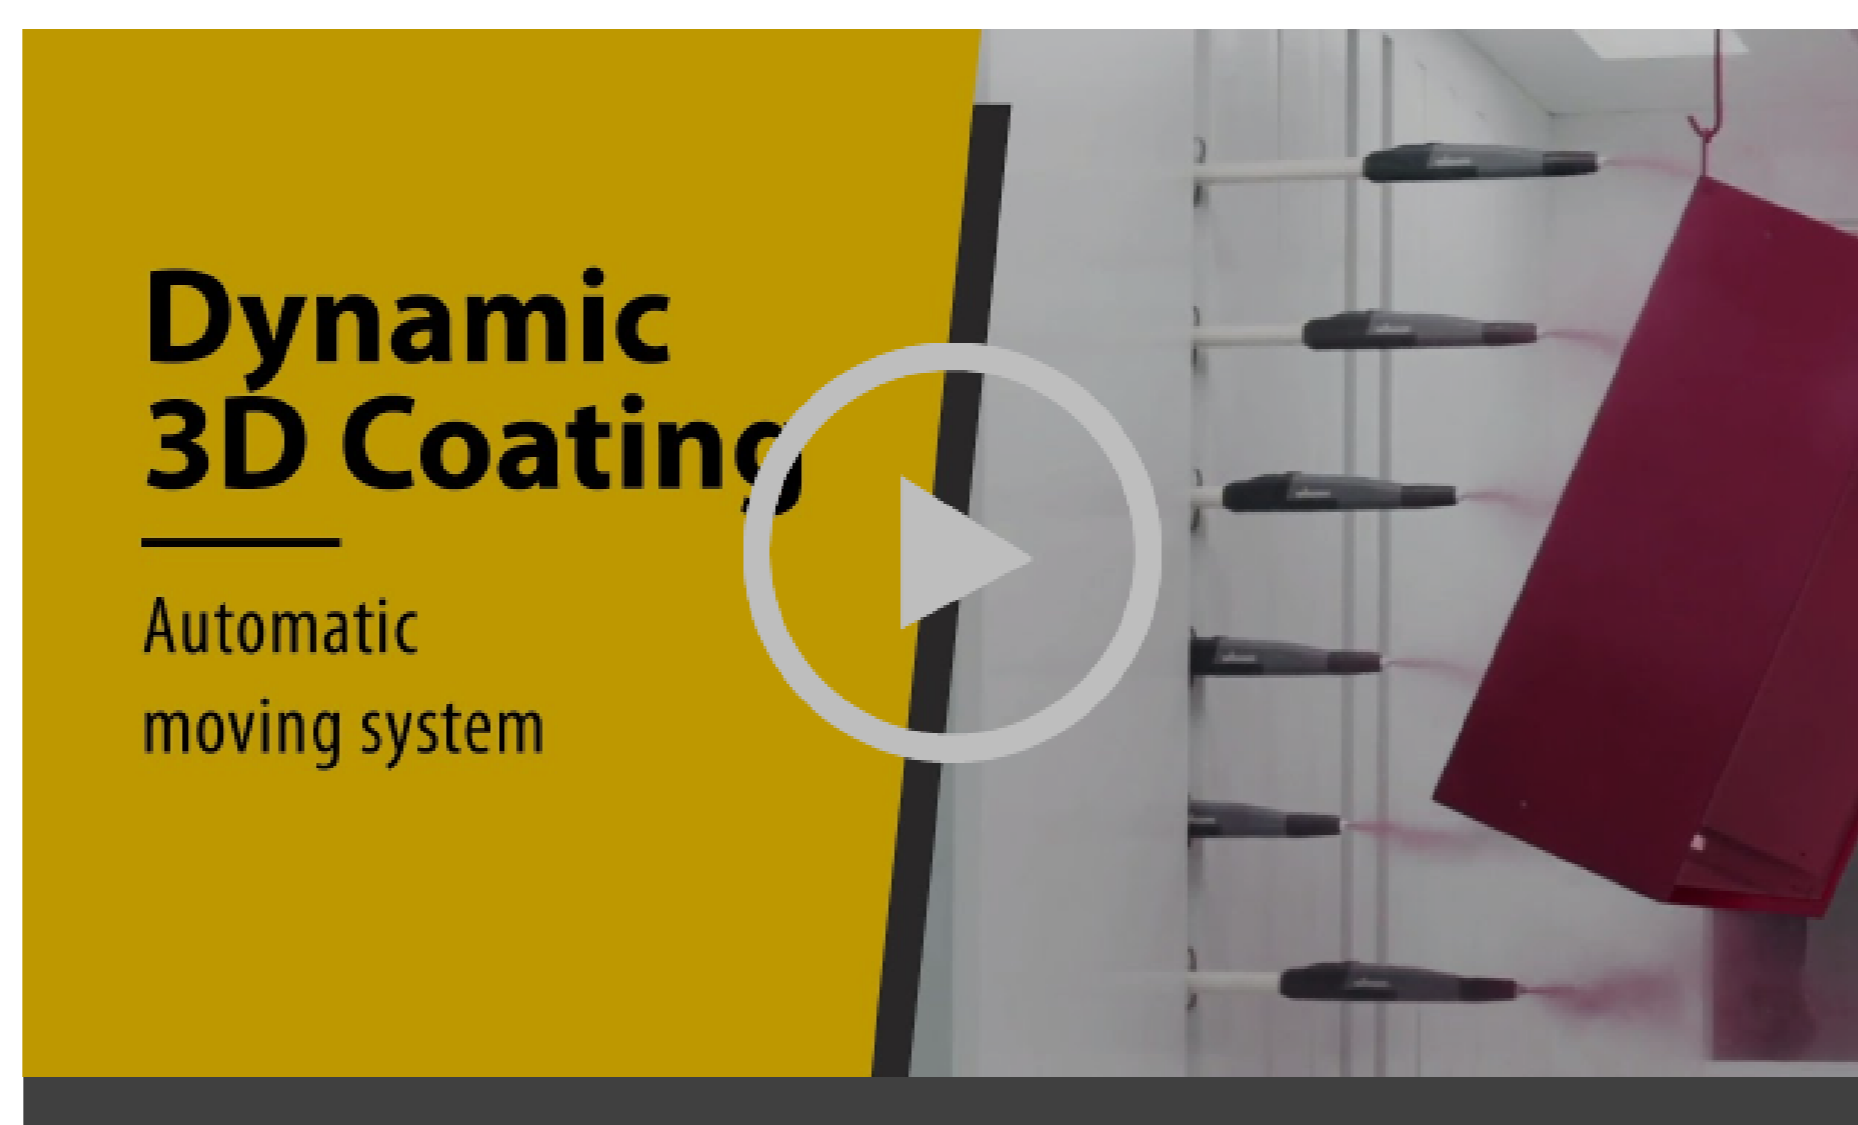

Learn how Fox Laser successfully uses the **information and management platform COATIFY** by WAGNER to optimize its powder coating process.

### POWDER COATING

#### Leading since 1988 with over 1,000 installed axes

Dynamic 3D coating enables precise movement control of the guns for maximum automatic area coverage with minimum powder consumption. Even workpieces with complex geometries are reliably detected by the automatic 3D scan.

### CUSTOMER REPORT

#### LSR dosing system for the specialists of the future

RICO in Thalheim (Austria) already uses **more than 30 LSR dosing machines from Reinhardt-Technik** (member of the WAGNER Group). RICO also trusts in the reliable and energy-efficient LSR eTwin 200 dosing system for the trainees at the new injection moulding machine in the training workshop. This means that the experts of the future can use the best technology of today at an early stage.
