

November 2023

Halved color change times thanks to high-tech powder system

Dear ladies and gentlemen,

the Italian company **Nord Laser** specializes in processing metal sheets for various industries, including customers in the steel construction, energy, furniture and fitness equipment sector. Due to increasing customer demands, Nord Laser installed a state-of-the-art powder system with the **IPS coating center**.

The result:

- Color change without manual intervention
- Fast and consistent throughput times
- Accelerated production
- Higher quantities
- And improved surface quality
