LIQUID COATING

High-quality results even in continuous use

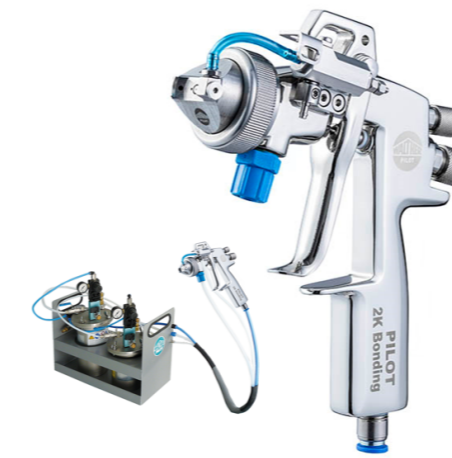

With the manual airspray gun **WAGNER TOPFINISH GM 1010G CAT-X** with gravity-feed cup, high-quality surfaces made of wood, metal or plastic can be ideally coated. It is suitable for all coating materials, since all parts in contact with the material are made of stainless steel. The ergonomic design of the gun with the even weight distribution allows fatigue-free working.

ADHESIVE APPLICATION

Twice as strong

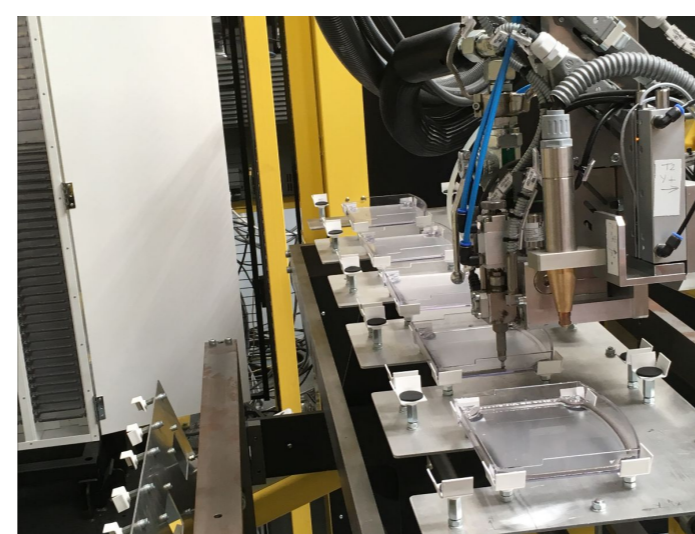

The **PILOT 2K BONDING** of WALTHER Spritz- und Lackiersysteme GmbH (member of the WAGNER Group) is a manual gun for 2-component dispersion adhesives, which are processed in an external mixing process. It is used wherever highest demands on application and effectiveness must be met. The new version has been supplemented with a round/broad jet regulation as well as material quantity regulation for the B component. The material consumption is reduced and an exact mixing ratio is achieved.

PRACTICAL REPORT

Innovative foam dosing technology reduces costs

The British manufacturer **ASD Lighting** has been producing a wide range of lights for various applications since 1983. In order to keep the promise of "delivery in one week", the sealing process is now carried out in-house. The high-precision **ContiFoam foam dosing technology** from **Reinhardt-Technik GmbH** (member of the WAGNER Group) selected for this ensures high production quality at reduced costs.

COMPANY

Solar system with record dimensions

The WAGNER Group subsidiary in the USA, **Wagner Spray Tech Corp.**, has installed the largest solar system currently available in the US state of Minnesota on its new roof. 3,700 individual panels produce 1,643,000 kWh per year. This amount would cover the average annual power consumption of 410 German four-person households. Efficiency and sustainability are important to us not only in our products but also in our companies.

Next PaintExpo in 2022

PaintExpo
World's leading trade fair for industrial coating technology
26 - 29 April 2022 | Karlsruhe/Germany
Due to the tightened hygiene regulations for trade fairs in the German state of Baden-Württemberg during the current Corona situation, the PaintExpo will not take place again until 2022.
