PaintExpo Press Release  
February 2022

## 75 years of innovation: Better solutions for future-proof coating technology

### Participation at the PaintExpo in Karlsruhe, Germany (26 – 29 April 2022)

WAGNER offers the entire range for every application area, from individual components to fully automated coating systems. The increasing demand for digital and automated coating processes is met with comprehensive system solutions.

The trade fair highlight in the powder sector are highly efficient automation solutions such as the **IPS coating center** - an innovative complete solution that achieves consistently high coating results over a long period of time. **Dynamic 3D coating** enables precise gun movement control for highest automatic area coverage with minimum powder consumption. With an extension of the proven entry-level **E-Line system (E-Line Plus)**, users can now meet even higher demands on the quality and productivity of their powder coating.

WAGNER's **liquid coating products** offer a wide range of options and efficient material consumption for use in a wide variety of industries. The range extends from manual and automatic guns for airless, AirCoat and airspray applications, high-speed rotation atomizers for automated coating with robots and reciprocators, to perfectly coordinated complete solutions that are ready for immediate use and easy to integrate.

The **web-based information and management platform COATIFY** enables reliable productivity monitoring to optimize costs and quality. The user has important performance data at a glance anytime and anywhere and can take timely measures to optimize system availability and productivity.

Co-exhibitor at the booth is **WALTHER Spritz- und Lackiersysteme GmbH** (member of the WAGNER Group). From complex material conveying systems to high-performance precision spray guns, the company offers the optimal solution for handling and application.

Trade fair visitors can also get information about various services. With its wide range of online and offline training courses, the **WAGNER Academy** imparts expert knowledge on all aspects of the latest application

technology. In addition to the **WAGNER service app**, the innovative use of the **Microsoft HoloLens** during service calls and application trials also ensures that your own coating system is always running reliably.

You will find us in **hall 3 at booth 3330!**
