

Solutions for the perfect surface.

With the SISO 2K high-solid coating systems from Sigel and WAGNER Industrial Solutions application systems.

Fast - Flexible - Sigel.

Are you looking for a coating? We manufacture it!

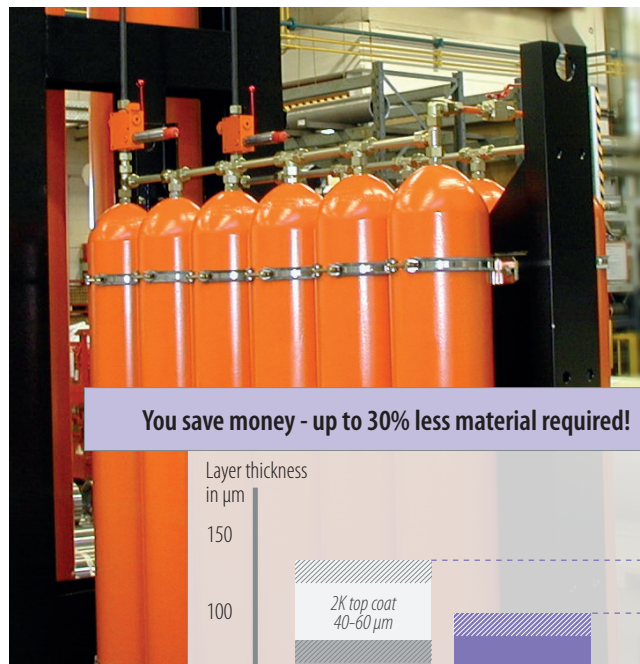

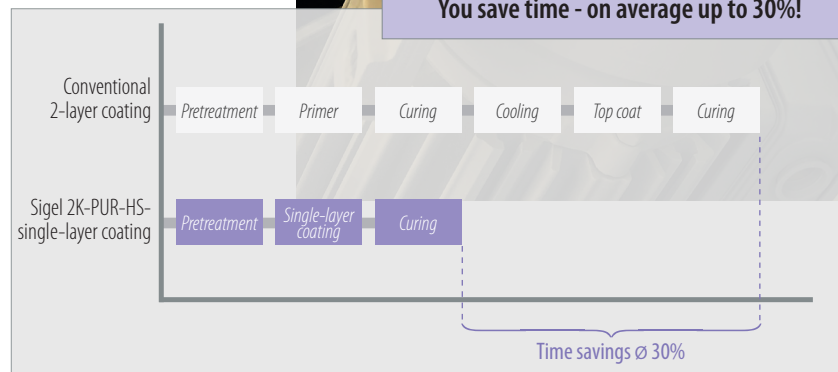

The pacesetter - Speed is its strength!

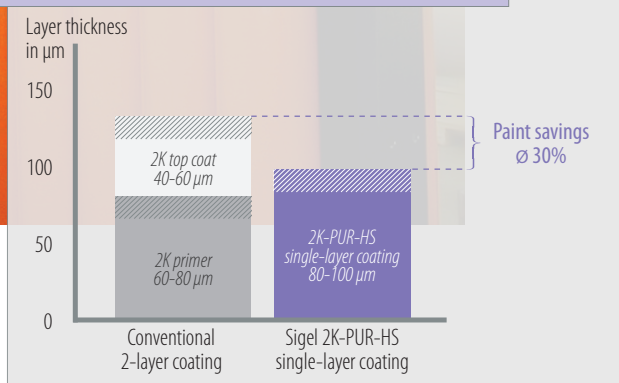

The SISO 2K-PUR-HS single-layer coating - product series 5070 - combines maximum coating quality with fast drying properties. Ideally suited for single-layer coating solutions in interior applications. Areas of application include steel, machine, equipment and plant construction. You save time - on average up to 30% compared to conventional multi-layer buildups.

Advantages:

- Excellent adhesion even on difficult substrates
- Ready for installation within a few hours, no forced drying necessary
- Continuous temperature resistance up to 155 °C
- High impact and shock resistance
- Excellent processing properties
- Problem-free processability with all common application methods
- Very good chemical resistance
- Can be combined with other SISO coating systems

You save money - up to 30% less material required!

The all-rounder - Maximum protection in one layer!

The SISO 2K-PUR-HS single-coat paint - product series 5010 - combines high corrosion protection with maximum user-friendliness. The high-solids paint system is ideally suited for both interior and exterior applications. Areas of application include storage tank construction, ACE machines, engine and drive technology, silo and crane construction. You save money - up to 30% less material is required compared to conventional multi-layer structures.

Advantages:

- Very low VOC content
- Excellent stability (>400µm liquid layer thickness)
- Excellent corrosion protection properties
- Excellent adhesion to metallic substrates
- Weather resistant
- Resistant to aggressive media
- Can be combined with other SISO coating systems
- Easy processability with all common application methods

Ideally matched solutions for the metalworking industry.

Airspray applications with GM 1030P & ZIP 52

The **WAGNER TOPFINISH GM 1030P** airspray manual gun provides high-quality components for outstanding surfaces. It is ideal for a wide range of applications. The reliable and durable **WAGNER ZIP 52** double diaphragm pump meets all requirements for manual and automatic applications and multi-gun use. It is ideal for material transport and use in circulation systems.

Advantages:

- Optimum atomization
- Low maintenance
- Easy handling
- Minimal pulsation
- Flexible applications

AirCoat applications with WAGNER Cobra 40-10

The ergonomic **WAGNER GM 4700AC** AirCoat gun ensures an extremely soft spray pattern and perfect surfaces due to the reduced material pressure. With the **WAGNER Cobra 40-10** high-pressure double diaphragm pump, almost all materials can be processed thanks to its shear-free and hermetically sealed design, including shear and moisture-sensitive materials or UV coatings. It is ideally suited for single coating stations up to complex multi-color systems.

Advantages:

- Optimum atomization
- Ergonomic design
- Reliable results
- High efficiency
- Suitable for frequent color changes
- Flexible applications

Electrostatic application systems

With the **WAGNER electrostatic manual and automatic guns GM 5000 and GA 5000**, a soft and homogeneous spray jet is achieved for high coating quality and a high application efficiency. Typically, 30-50% of material can be saved compared to conventional coating processes. The **WAGNER TOPFINISH Bell 1S** high-speed rotation atomizer can coat both small workpieces and large areas with high efficiency. It can be mounted on reciprocators and linear axes.

Advantages:

- Fine atomization
- Low maintenance
- High efficiency
- High material savings
- Safe working
- Flexible applications

WAGNER

We bring color, protection and function to surfaces.

The J. Wagner GmbH is one of the world's leading manufacturers of equipment and systems for the finishing of surfaces with powder coating and liquid lacquers, paints and other liquid materials. The Industrial Solutions division with its brands WAGNER, WALTHER PILOT, Reinhardt-Technik and C.A. Technologies stands for high quality, efficiency and productivity in all areas of industrial applications. Whether complete systems or single components – we offer you the entire range of technologies and individual solutions for your specific requirements.

Sigel Lacke

We develop and produce customized coating systems.

The Coating and Paint Company J. Sigel & Sohn GmbH has existed for more than 130 years as a medium-sized family business in Baden-Württemberg. Sigel Lacke offers a comprehensive portfolio and supplies the metalworking industry with both complete systems and exclusively developed products. Its customers include craft businesses and internationally active corporations. As a competent and experienced development partner, we support you in individual coating projects from the initial idea to series application.
