## Electrostatic Gun Spray Packs

The atomization systems of the Wagner 5000 series is the result of years of experience in the field of electrostatic coating. WAGNER's unique know-how in electrostatic charging ensures unrivaled finishing thanks to a soft spray pattern and excellent electrostatic action. The optimal surface quality, high transfer efficiency and reduced consumption are a strong economic advantage guaranteeing you a quick return on your investment. Maximum material savings and easy cleaning and maintenance make Wagner Electrostatic Paint Systems the optimal choice. The spray guns of the Wagner 5000 series are versatile devices which, are ideal for a variety of media.

### Ergonomic Design

Designed for reducing operator fatigue. The right combination of ultra light weight, ergonomic design, low trigger force and excellent balance lead to a gun with optimum working comfort for small and large hands.

### Superior Spraying Results

The specially developed air caps and nozzles provide a superior spraying result. Many different air caps are available to achieve outstanding atomization and fan adjustment with different paints.

### Ultra Flexible Electrode

The ultra flexible electrode provides reproducible performance of the gun, guaranteeing excellent electrostatic attraction and high transfer efficiency.
