

With its excellent atomization, the versatile TOPFINISH GM 1030G airspray gun delivers high-quality coating results, especially on smaller surfaces.

Flexible application possibilities

The gravity cup gun is ideal for small-area coating applications and touch-up work, such as in the wood, metal or plastics industries. Suitable for all material types as all wetted parts are made of stainless steel. High flexibility due to a wide range of nozzle sizes and air caps.

High efficiency

Transfer efficiency of up to 88%. Excellent atomization quality and low paint mist thanks to optimized air duct and 12-hole air distribution nozzle.

Reliable coating process

Individual and precise material flow with fixable needle stroke adjustment. Large material and air passages of the components allow very fast working.

Low maintenance

Due to the two-part nozzle, it is sufficient to replace only the nozzle head instead of the complete nozzle, if necessary. Long-life needle packings and solvent-resistant polyethylene seals contribute to high availability.

Easy handling

Easy positioning of the air cap without loosening the screw ring. Individual adjustment of the spray jet width with just one rotary knob - from flat to round jet. Fatigue-free working thanks to ergonomic design and optimum weight distribution.

Technical data

Characteristic	Data
Air cap (atomization technology)*	Conventional HVL ^P _{Plus} HVL ^P
Nozzle size*	Ø 1.0 - 2.2 mm 6 sizes in total
Wetted parts	Stainless steel
Air inlet	G 1/4"
Air inlet pressure	Max. 8 bar (116 psi)
Volumetric air flow (liters per minute)	HVL ^P _{Plus} 280 HVL ^P 380 Conv 12 260
Weight	419 g

*Air caps, nozzles and other spare parts components are each also compatible with TOPFINISH GA 1020/1030 and TOPFINISH GM 1030P airspray guns.

Available sets

Single gun set (cardboard box)

- GM 1030G gun with 600 cm³ gravity cup
- Conventional, HVL^P or HVL^P_{Plus} air cap
- One nozzle (sizes: Ø 1.0 / 1.2 / 1.5 / 1.8 / 2.0 / 2.2 mm)

Economy set (cardboard box)

- GM 1030G gun with 600 cm³ gravity cup (Ø 1.5 mm, HVL^P_{Plus})
- Conventional air cap
- 2 nozzle-needle sets (sizes: Ø 1.0 / 1.8 mm)

Deluxe set (case)

- See economy set
- Mini pressure gauge / regulator
