

INNOVATION SINCE 1947

Perfect surfaces and added value are our passion. Bringing colour, protection and function to surfaces is our mission. We dedicate all of our technical expertise to your objects and products, and support you with personal service. Using innovative technologies and highly efficient, reliable and user-friendly solutions, we are constantly setting new standards in surface technology.

For each newly purchased professional paint sprayer you receive a 3-year manufacturer's warranty from WAGNER. By registering online you can turn the 3-year standard warranty into a 5-year WAGNER professional warranty. This is unique within the industry! Our professional quality is the key and that's a promise.

ADVANTAGES OF XVLP LOW PRESSURE SPRAYING

XVLP stands for eXtra Volume Low Pressure and refers to a low-pressure spraying technology which, in contrast to HVLP technology, works with 60 % higher air volume and 30 % better coverage. This results in an extremely high working speed with minimal spray mist. With this extra power, a significantly higher range of different materials such as high-viscosity lacquers and emulsion can be processed (additional spray attachments are available for this purpose).

EXTRA VOLUME LOW PRESSURE

PARTICULARLY POWERFUL AND FLEXIBLE:

In low-pressure spraying, the atomising air generated in the turbine flows through an air hose to the paint container on the spray gun, where it then builds up pressure. This delivers the coating material through the material tube to the nozzle and atomises it with the remaining air. The XVLP sprayers from WAGNER deliver an especially high air volume and thus optimum atomisation.

WELL-EQUIPPED FOR DAILY USE ON CONSTRUCTION SITES:

The modular system consisting of a turbine and various spray attachments enables the application of wood stains, varnishes and lacquers through to emulsions. The XVLP devices from WAGNER are perfect when starting to use spray equipment or to add to the range of devices available on site.

OPTIMAL ADAPTATION POSSIBILITIES:

The air and material volumes can be adjusted by dials directly on the gun allowing quick adjustment to different objects.

FINISHCONTROL 5500

Voltage	230 V / 50 Hz
Motor power	1.15 kW
Operating Pressure max.	0,29 bar / 0,029 MPa
Weight	6,6 kg
Technology	Turbine
Scope of delivery	Base unit FinishControl 5500, Air hose 5 m incl. handle, XVLP Spray attachment StandardSpray, Cleaning kit
Article number	2422986

More about the FinishControl 5500 online:
go.wagner-group.com.fc5500

Click & Paint System - detachable gun for fast spray attachment changes and simple cleaning

Direct Spray Control - precise and easy handling due to adjustable material and air volume, as well as the spray pattern, directly on the gun

Spray attachment StandardSpray - pleasant to work with due to low spray mist and compact, extra-light design. The minimal number of components ensures easy cleaning and maintenance

Filter warning light - indicates when the filter needs cleaning or replaced

Integrated storage box - ideal for needles, air caps, tools and cleaning accessories

Cup holder - ideal for storage and transport of 1000 ml XVLP cups

Twin air filters - easily accessible filters with large surface for optimal atomisation

FC 5500 - PERFECT FINISHES MADE EASY

FinishControl 5500 from WAGNER is the ultimate choice when it comes to painting, touch-up or renovation work. Solvent or water based paints, stains, varnish, impregnations, oils and primers can be applied.

With additional spray attachments, it is also possible to use emulsion paints, making this handy paint sprayer very versatile. Doors, windows, stairs and other surfaces can be coated fast.

Thanks to Click&Paint technology, the spray attachments can be changed with a flick of the wrist, so that not only material and application changes, but also cleaning can be carried out quickly. Direct Spray Control allows the material and air volume to be adjusted and the spray jet shape to be set directly on the gun.

During work breaks or for storage, the practical storage tray can be used. The compact and extra-lightweight design makes the FinishControl 5500 convenient to use anywhere.
