

SPRAYING SYSTEM

BRUSH

ROLLER

PERFECT RESULTS

Contactless and even paint application - no brush or roller marks, perfect coverage and first-class surface quality, with only a small amount of spray mist too.

EASY TO CLEAN

The turbine does not come into contact with paint - all you have to do is rinse the attachment. To do this, dismantle the spray attachment and clean the individual parts thoroughly under running water/solvents.

FAST CHANGEOVER OF PAINT AND MATERIAL

The spray attachment is disconnected from the turbine with one click. This makes cleaning as well as paint and material changes quick and easy.

SAVE TIME

At least 3 x faster than with a brush and roller. Simply mask and go. You'll be amazed by how quickly the job is finished.

LIGHTWEIGHT AND COMPACT PAINT SPRAYER-IDEAL FOR BEGINNERS

The compact W 125 paint sprayer is an ideal introduction to the world of paint spraying for first-time users. It is suitable for the application of wood and metal paint, varnish, wood preservatives and primers in small to medium-sized indoors and outdoors projects. Compact size and light weight ensure it is less tiring to use. Intuitive setting options ensure easy handling. The three-way-adjustable spray jet, which offers horizontal, vertical and detailed round spraying, ensures comfortable working.

No matter what you have to do around the house, whether it's upgrading old furniture, a fresh coat of paint for a garden bench or weather protection for a wooden fence - with the W 125 paint sprayer you are well prepared for any challenge!

Freshen up garden furniture with paint!

Apply weather protection quickly!

QUICK HELP

go.wagner-group.com/diy-faqs

WHICH PAINTS CAN BE USED?

All conventional water and solvent-based varnishes, oils and woodpreservatives. Masonry paints can't be used. Seek advice in specialist stores and check the technical information sheets.

DOES THE PAINT HAVE TO BE DILUTED?

Highly viscous materials should be diluted in 10% increments. Use water for water-based materials and solvents for solvent-based materials.

WHAT NEEDS TO BE CONSIDERED WHEN MASKING?

All surfaces that are not to be sprayed should be masked off with a 10-15cm-border. Furniture should be covered with a dust sheet.
