

SPRAYING SYSTEM

BRUSH

ROLLER

PERFECT RESULTS

Contactless and even paint application - no brush or roller marks, perfect coverage and first-class surface quality, with only a small amount of spray mist too.

EASY TO CLEAN

The turbine does not come into contact with paint - all you have to do is rinse the attachment. To do this, dismantle the spray attachment and clean the individual parts thoroughly under running water/solvents.

FAST CHANGEOVER OF PAINT AND MATERIAL

The spray attachment is disconnected from the turbine with one click. This makes cleaning as well as paint and material changes quick and easy.

SAVE TIME

At least 3 x faster than with a brush and roller. Simply mask and go. You'll be amazed by how quickly the job is finished.

SUITABLE FOR VIRTUALLY ALL PAINTS

Devices can process virtually all paints. Highly viscous materials, however, should be diluted in 10% increments. Use water for water-based materials and solvents for solvent-based materials. This will ensure that every paint application is a success. Exterior masonry paints unfortunately cannot be sprayed with this device.

GET COSY

Do you want to freshen up your walls and ceilings with a new coat of paint or completely change your colour design? Do you want to spray your doors, interiors and garden furniture or fences? Make your painting and decorating ideas come to life in your own style. Do you find the work fun, but still insist on a perfect result? Then WAGNER products are just what you're looking for. Simply spray!

Brighten up your garden furniture

Give your gate a fresh new colour

QUICK HELP

wagner-group.com/diy-faqs

HOTLINE: +44 (0) 1327 368 410

WHICH PAINTS CAN BE USED?

All conventional water and solvent-based wall paints, varnishes, oils and wood-preserveds. Masonry paints can't be used. Seek advice in specialist stores and check the technical information sheets.

DOES THE PAINT HAVE TO BE DILUTED?

Highly viscous materials should be diluted in 10% increments. Use water for water-based materials and solvents for solvent-based materials.

WHAT NEEDS TO BE CONSIDERED WHEN MASKING?

All surfaces that are not to be sprayed should be masked off with a 10-15cm-border. Furniture should be covered with a dust sheet.
